

# Managing Radioactive Waste

## 1. Determine

- Segregate waste by physical form (solids vs. liquids)
- Collect long-lived isotopes separate from short-lived isotopes

## 2. Accumulate

- Use an accumulation log to record repetitive additions to the same waste container

## 3. Contain and Label

- Complete the following sections of the Radioactive Material Tag and attach to the container

**A** ("Physical Form")

**F** (all entries)

**G** ("Generator's Name")

## BERKELEY LAB RADIOACTIVE WASTE ACCUMULATION LOG

Container Description: \_\_\_\_\_

Date Added	Description of What Was Added	Amount	Isotope	Activity	Initials

Radioactive Waste Tag No. **R** \_\_\_\_\_ (HWHF 1/8/96 RA)

## 4. Dispose

- Do not keep your radioactive waste over 1 year.
- Complete remaining sections, sign
- Fax to x4838 along with a Radioactive/Mixed Waste disposal requisition
